

R96 | Monthly diagnosis state: extraction repair and forecast falsification

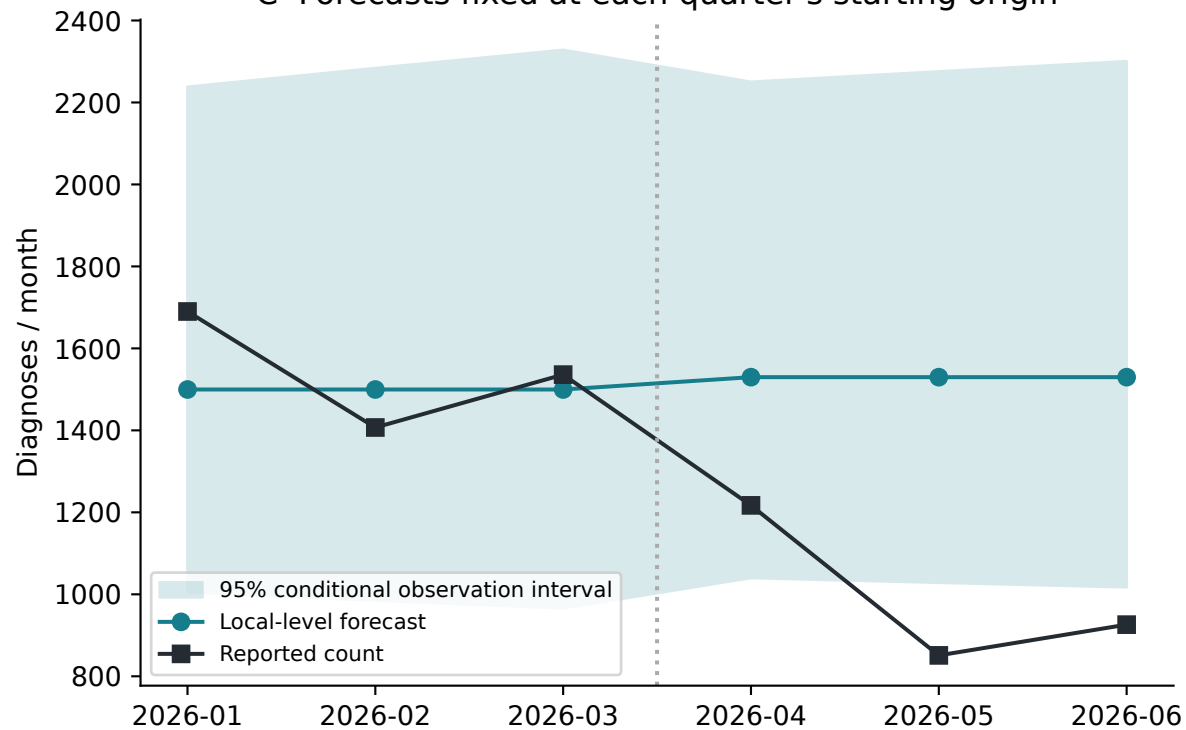

A Eight historical quarterly blocks, 2024-2025

B Retrospective 2026 quarterly challenges

C Forecasts fixed at each quarter's starting origin

D Evidence and decision

Monthly rows recovered: Q1 24 -> 39; Q2 12 -> 42

March 2026 revised: 1,536 (Q1) -> 1,533 (Q2)

Q2 forecasts use the unrevised Q1 training vintage.

Nested historical gate: True

Both-quarter carry/R41 gate: False

Frozen stock cone valid: True

No model promotion. Historical release dates unverified.

Reporting availability and diagnosis volume remain confounded.

Q2 was already inspected before this experiment.

Intervals omit parameter/source-revision uncertainty.
